Elementi Neo Mains Pressure Shower Mixer has a straightforward, geometric design with subtle, soft curves to offer an amazing bathroom accessory that can fit in with any room. Its soft lines and rounded edges give a modern but timeless look that improves your bathroom's look without compromising its functionality.

Available in various finishes like chrome, gun metal, and black, Neo Shower Mixer can fit any bathroom décor from traditional to contemporary. Finish is meticulously put on using advanced electroplating technology to impart a hard, wear-resistant surface that resists tarnish. Chrome plate finish, for example, is subjected to a three-step process involving copper, nickel, and a wear-resistant gloss top coating of chromium for a high-gloss finish.

Ideal for domestic and light business applications, this mixer is ideal for the kitchens, bathrooms, and laundries of domestic homes, hotels, motels, and retirement villages. Mains pressure resistant, it delivers a solid and reliable water supply.

The Neo Shower Mixer offers easy control with groundbreaking cartridge technology that offers broad operating angles and smooth silky operation. From water temperature to flow, the mixer works smart so every shower is easy and comfortable.

Supported by a 10-year guarantee for the product and 5 years for non-chrome finishes, the Elementi Neo Mains Pressure Shower Mixer is an assurance of robustness, form, and performance and therefore a shrewd and reliable choice for your bathroom.
